Pairing Your Remote Control System
For Systems Made In 2020 or Newer

Most RFHero Remote Control Systems manufactured *in 2020 or newer* will have a learn/pairing operation using just the **Transmitter**. .

Make sure to Press & Hold ALL THREE simultaneously!

1. Make sure the **Transmitter** (Handheld) has batteries and appears to be functioning. Cycle power to the **Receiver**. You have 60 seconds to complete the Learn Mode procedure once step 2 is complete.

2. After the **Receiver** Communications LED flashes three (3) times, press and hold *ALL THREE* Buttons on the **Transmitter**.

3. The Communications LED on the **Receiver** should now temporarily be lit solid green

4. The **Transmitter** and **Receiver** are now paired together.

This System Qualifies for
